iOS 9.0 and later versions

### Supported File Type

**Audio:** wav\mp3\wma\flac\aif\ogg\aac\m4a\m4r

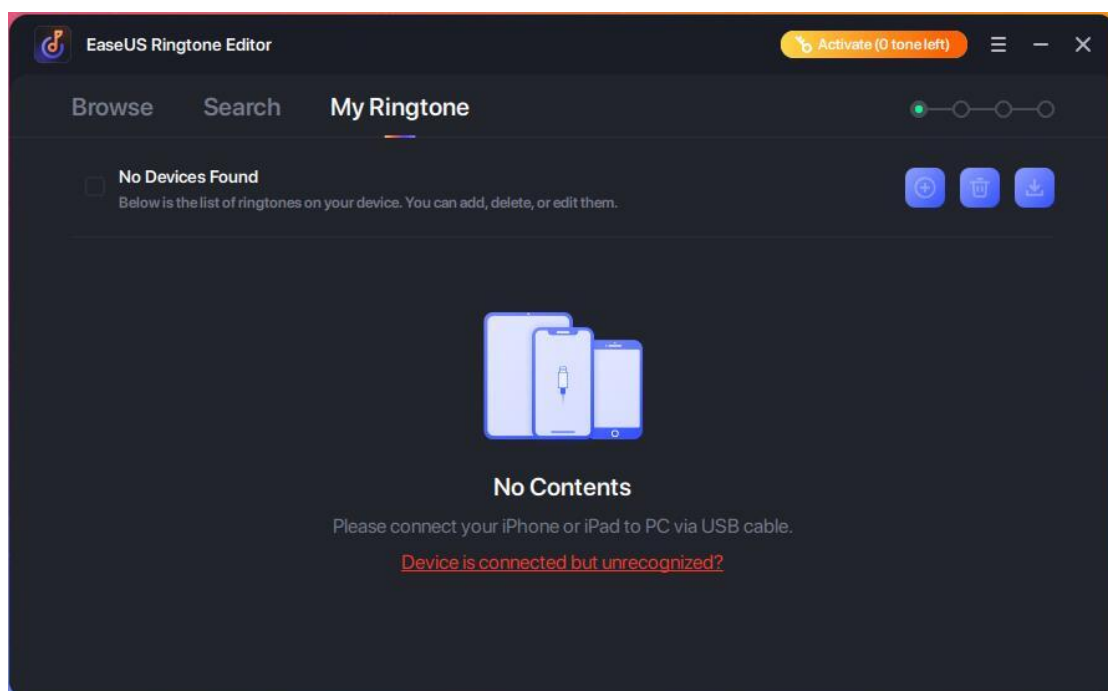

**Video:** MP4\MOV\WMV\FLV\AVI\3GP\WebM\MKV

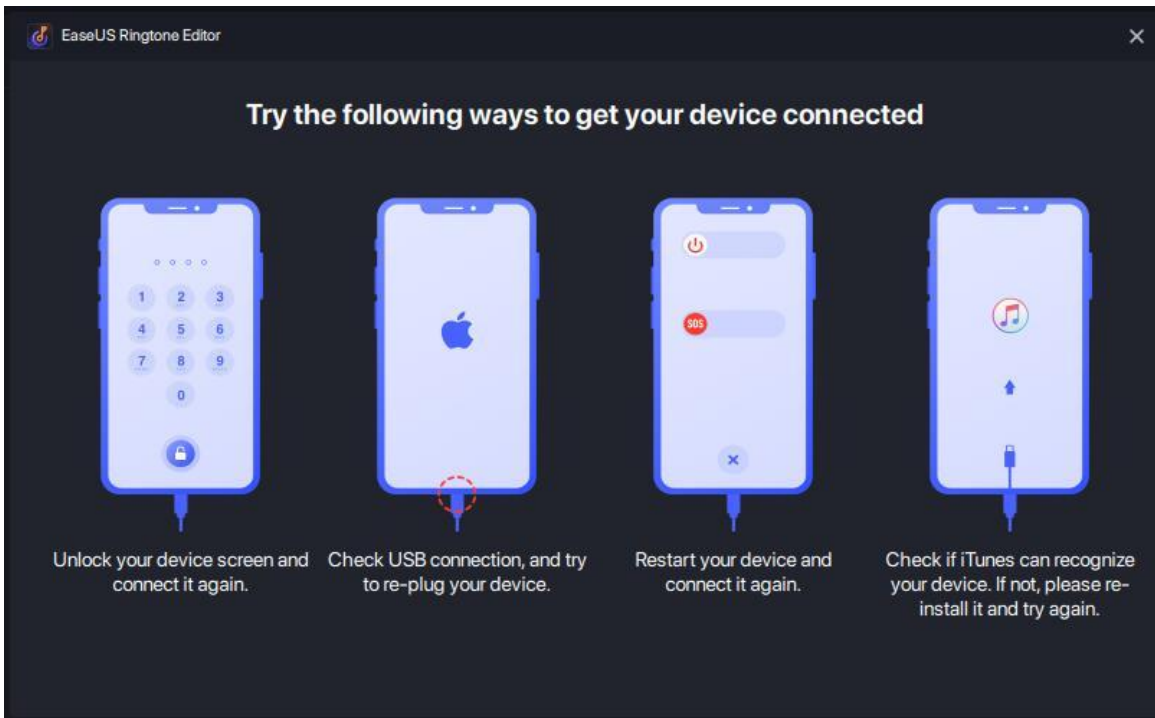

## Device Connection

Connect your iOS device to a Windows computer using a Lightning to USB cable. A genuine Apple lightning cable is preferred.

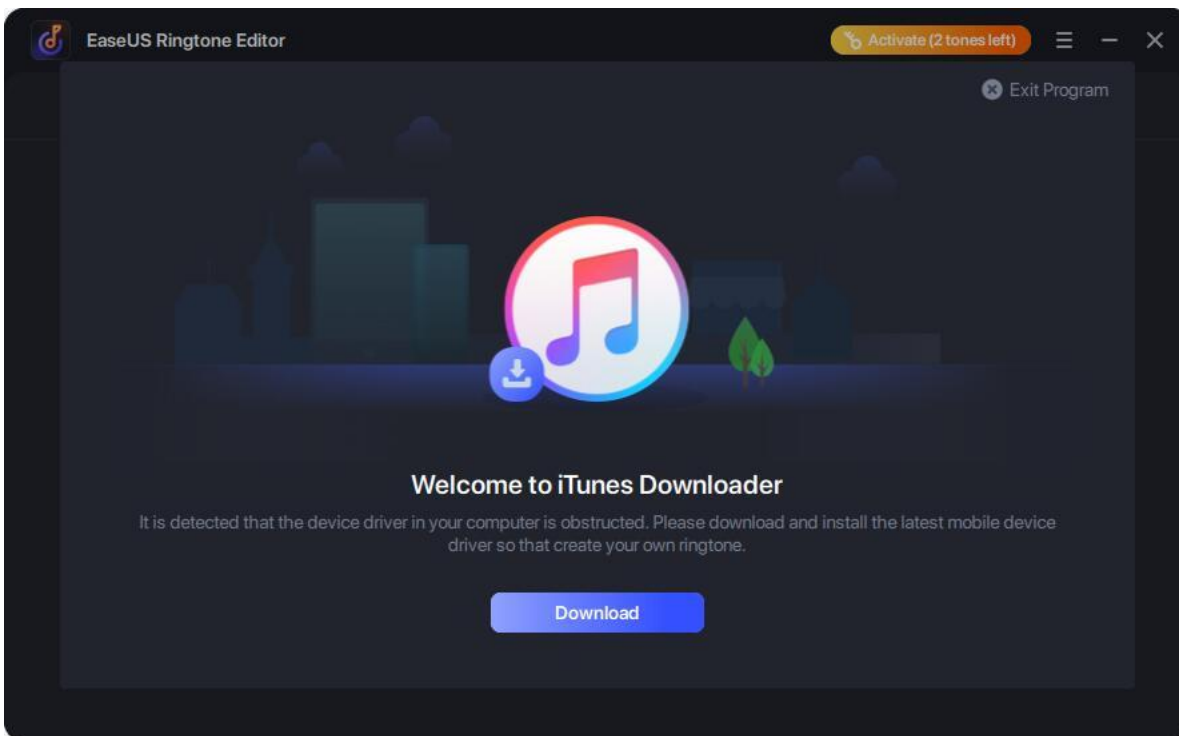

The following window will appear if the iOS device cannot be properly recognized. Follow the steps on this guide to retry the connection until your iOS device can be well detected in the product.

## Apple Driver

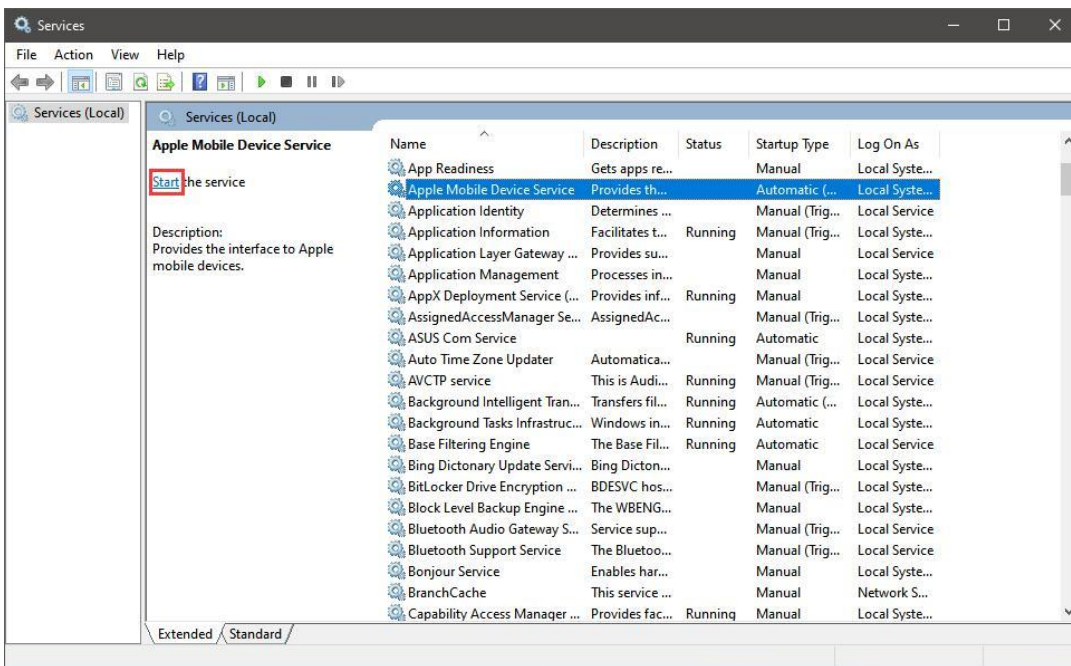

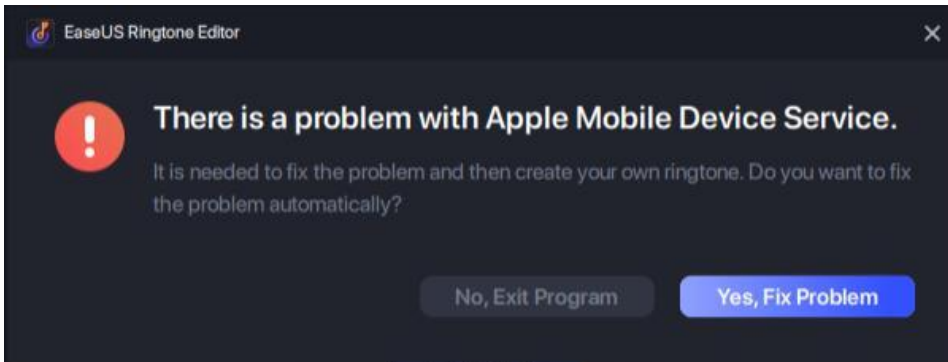

An iTunes Downloader window will pop up if our product detects that the device driver on your computer is obstructed. Click Download to initiate the download and installation for the proper driver of your iOS device.

## Apple Mobile Device Service

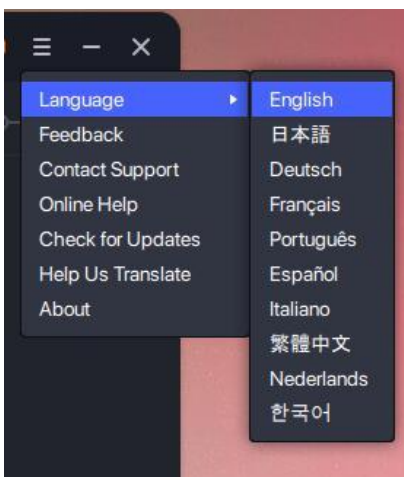

You will get an operation guide to start Apple Mobile Device Service if it is not running on your computer. Click the **Yes**,

**Fix Problem** to start Apple Mobile Device Service or start it in Windows Services.

## Settings

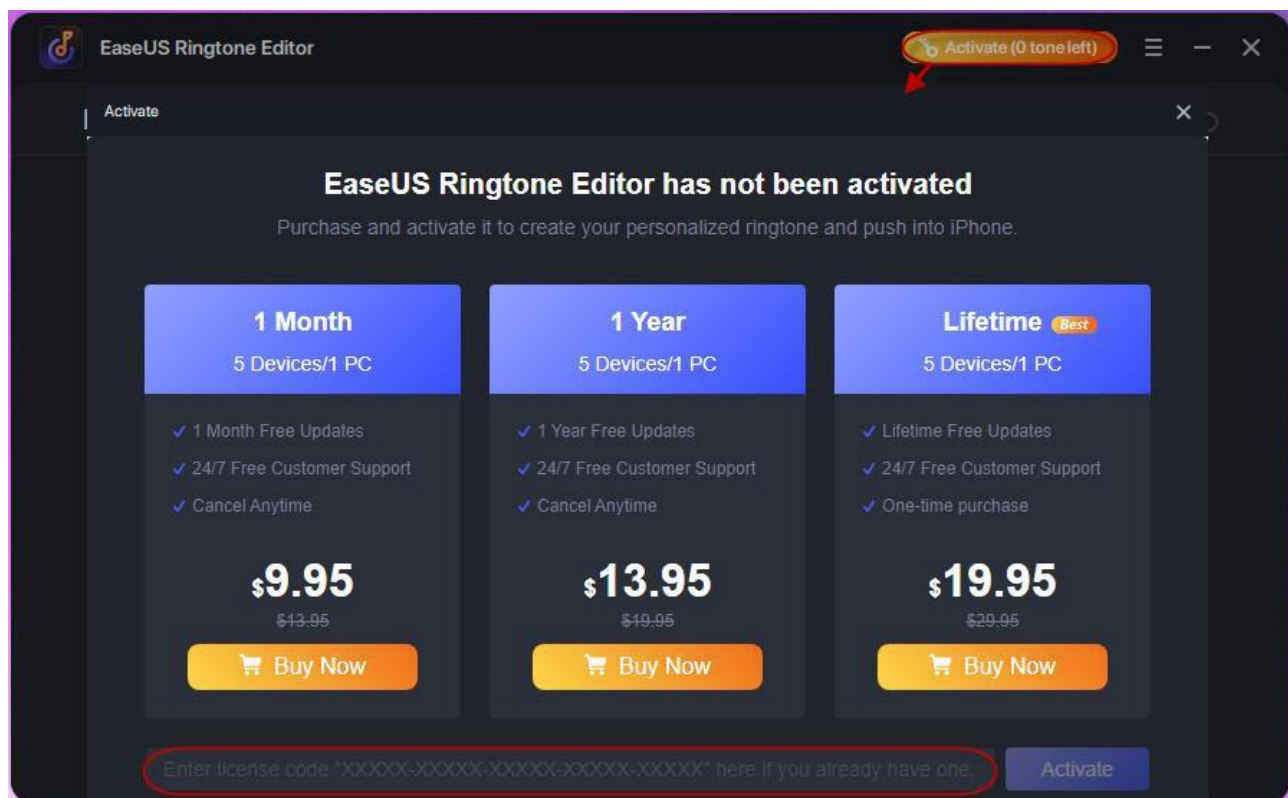

You are able to change the Language in Settings.

# Activation

EaseUS Ringtone Editor includes the trial and professional edition. Trial edition can only create **2 ringtone files** for testing, and the pro edition doesn't have this limitation. You can download the trial edition from [EaseUS Website](#).

The Activation button can be seen on the top right corner of the main interface in EaseUS Ringtone Editor. Click on the button to trigger the Activation Window, copy your license code into the Activation box, and click on the **Activate** button. The Trial will be upgraded to the Professional edition once the license code is properly applied.

## Note:

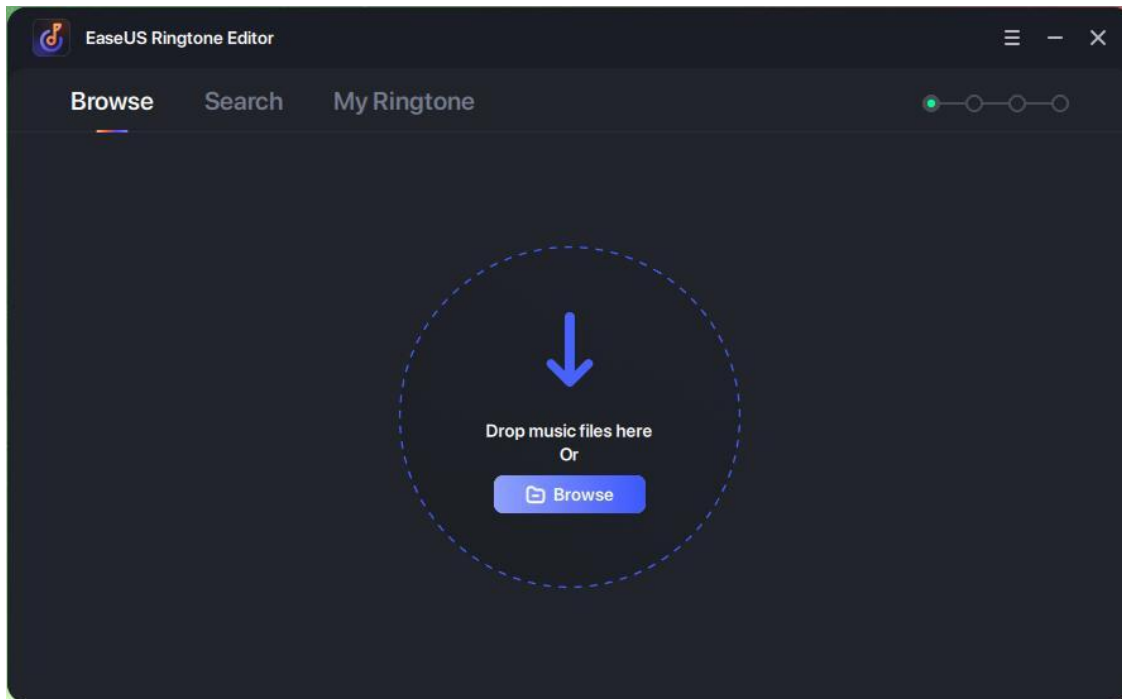

It is always strongly recommended to directly copy and paste (using Ctrl+C and Ctrl+V ) the license code into the activation box. This can avoid any possible typo when manually inputting the code.

Offline activation is not supported. Please ensure your computer is connected to the internet when activating EaseUS Ringtone Editor.

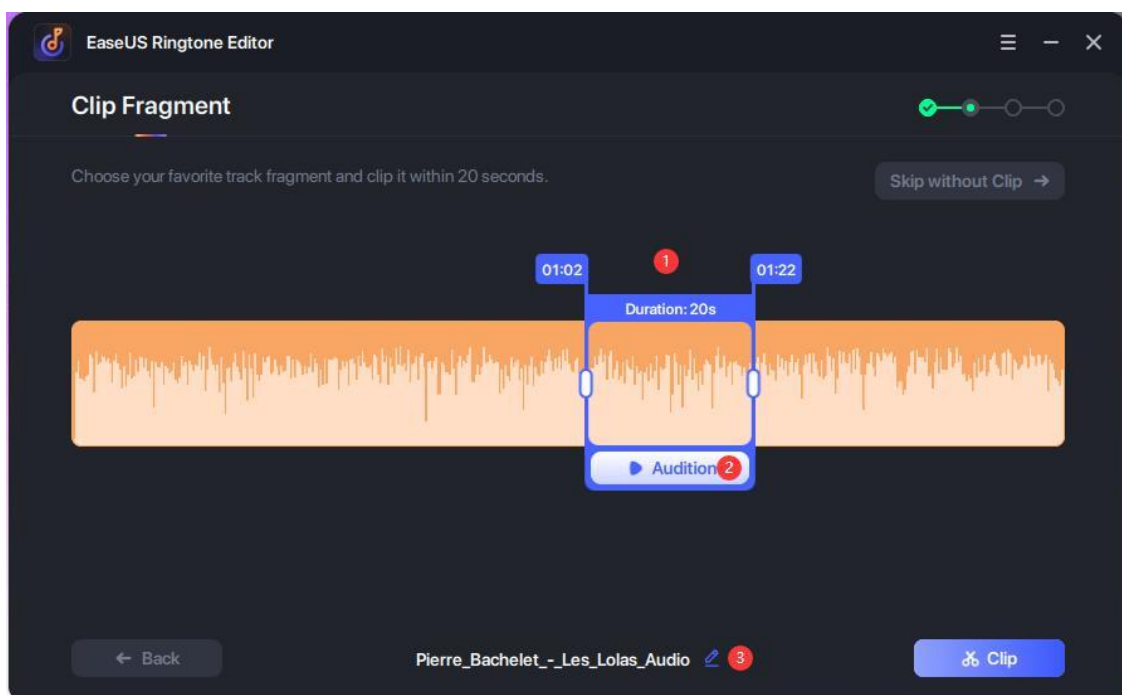

# Browse Local File to Make Ringtone

Ringtone Editor is easy to use that you don't need to be a computer expert to make your own personalized ringtone. With just a few simple steps your ringtone will be ready to set on your phone. Here is a step-by-step guide for you.

1. Click the **Browse** to select a local music/video file or directly drop music file to Ringtone Editor.

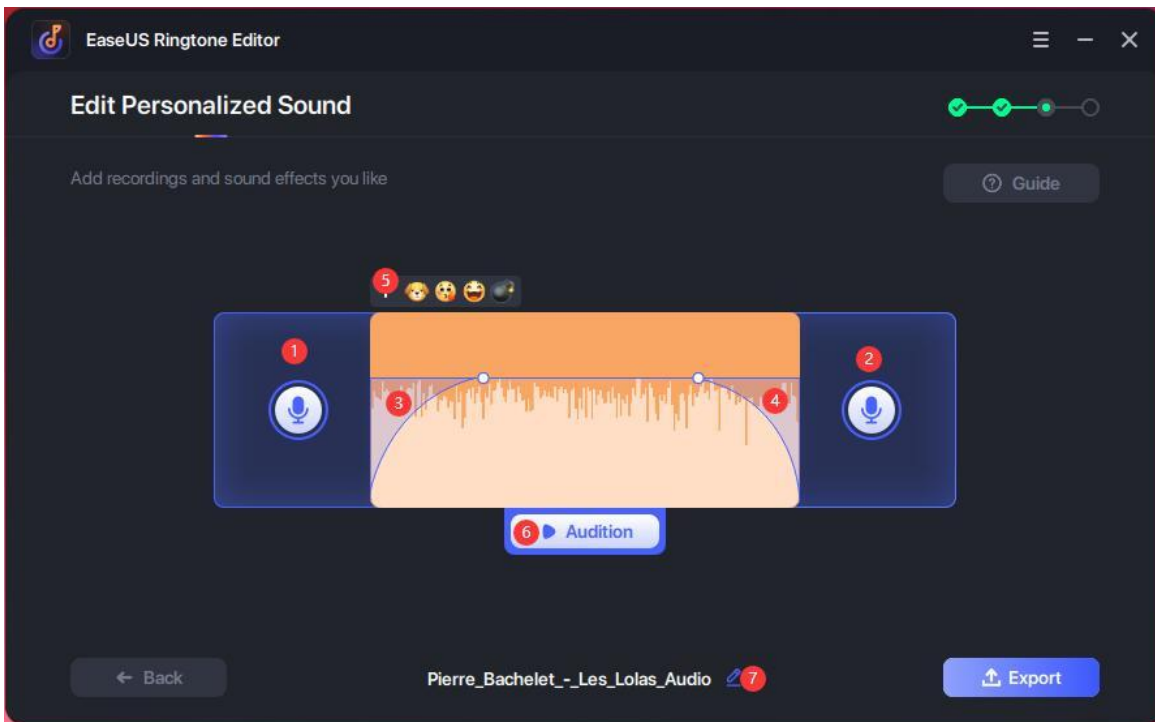

2. Choose your favorite track fragment and clip it within 20 seconds.

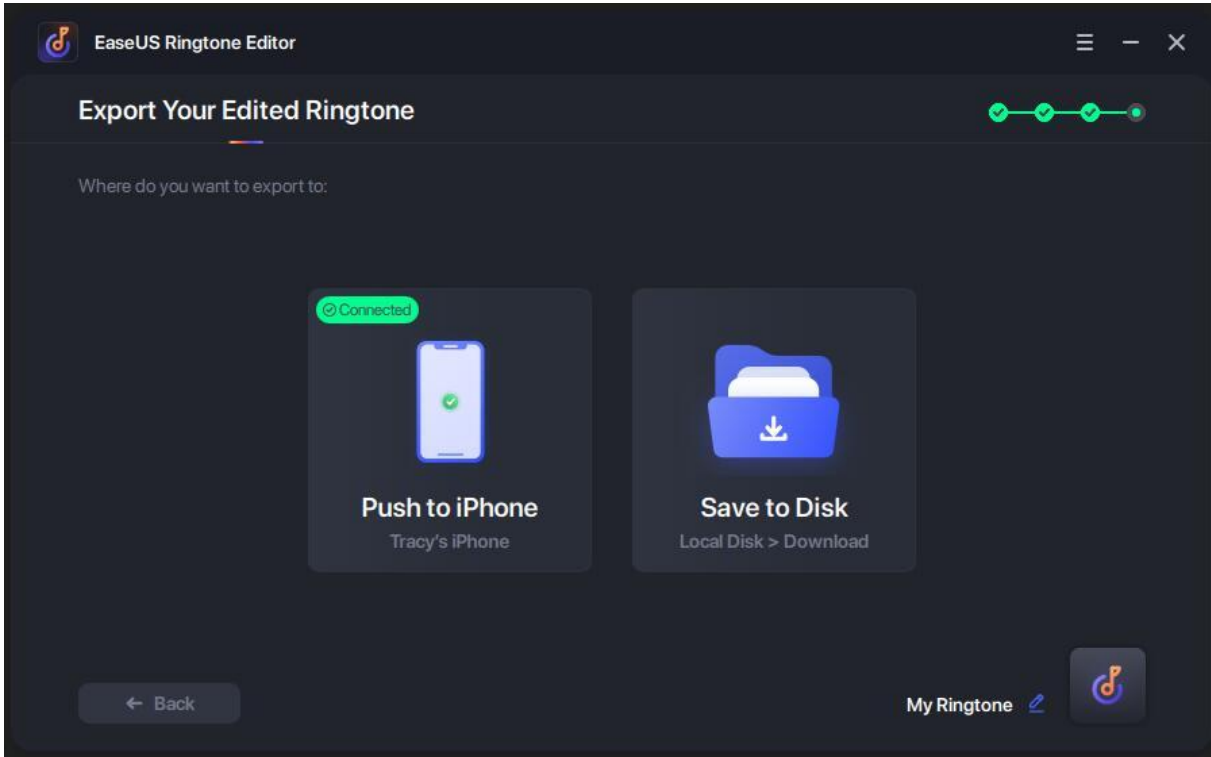

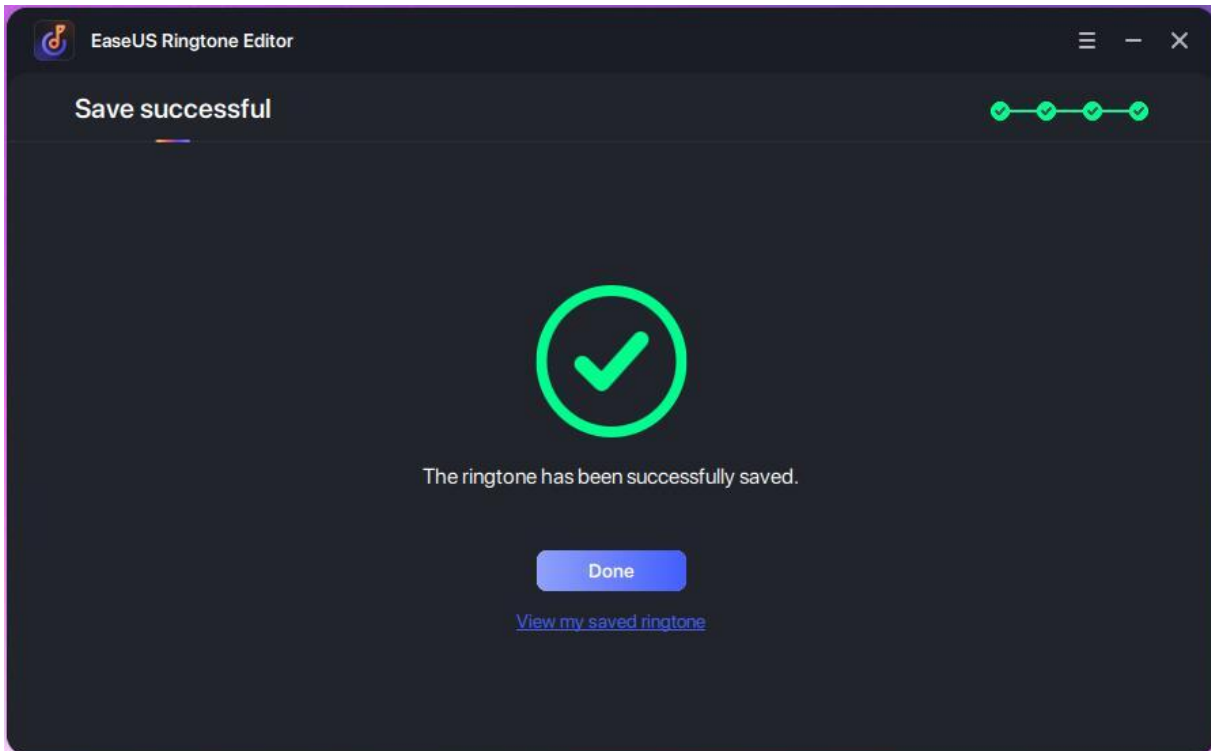

- 1 Choose the track fragment.
  - 2 Click the **Audition** to address your favorite track fragment.
  - 3 Rename the music file if you need.
3. Please add recordings and sound effects for your ringtone.

- 1 Add recording for the head of the ringtone.
  - 2 Add recording for the tail of the ringtone.
  - 3 Fade in the ringtone.
  - 4 Fade out the ringtone.
  - 5 Add the sound effects for the ringtone.
  - 6 Audition the ringtone music.
  - 7 Rename the ringtone file if you need.
4. Export the edited ringtone to local disk or directly push it to iOS device.

5. The operation was finished after the ringtone was pushed or saved successfully.

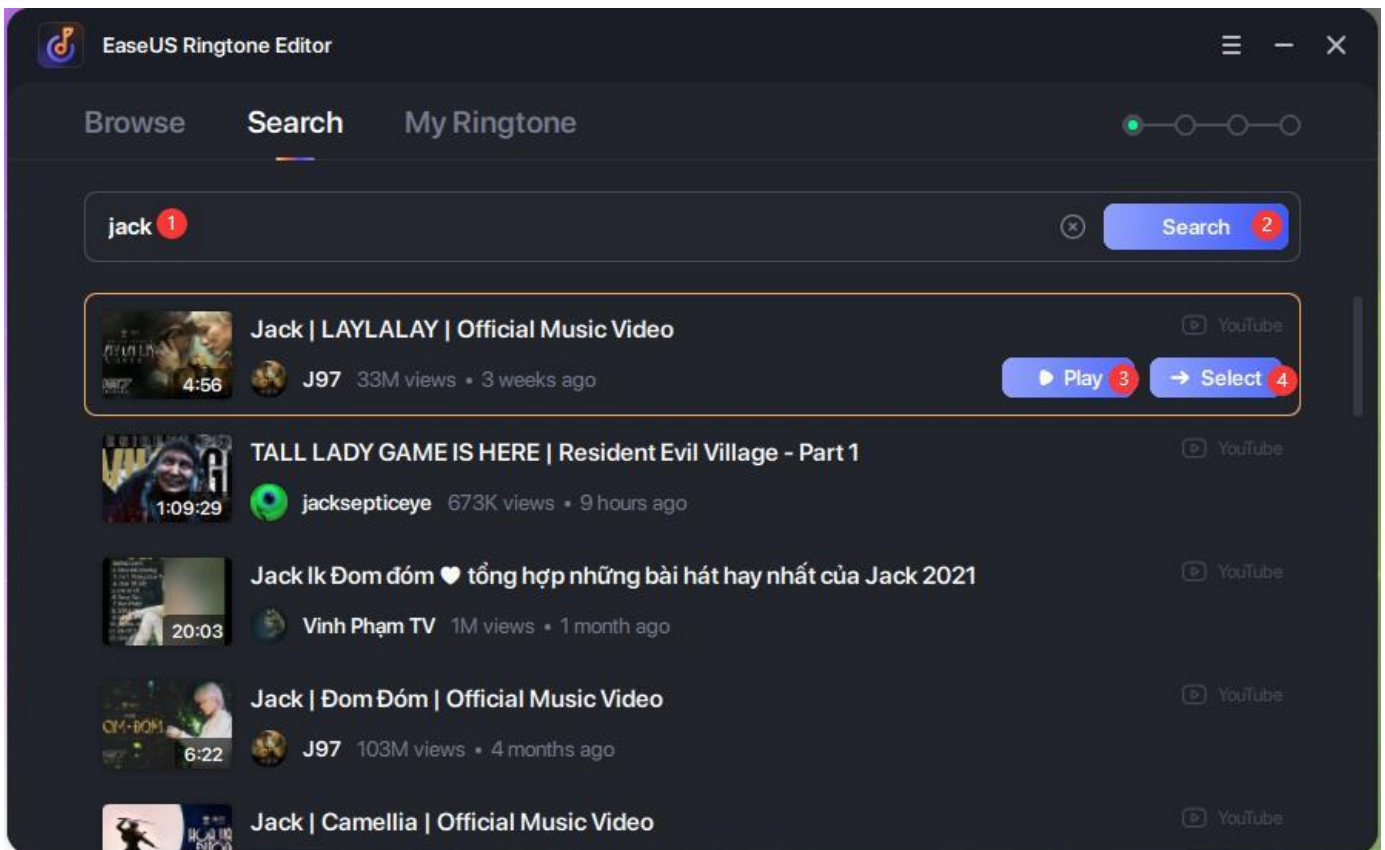

You can directly use the pushed ringtone on your phone.

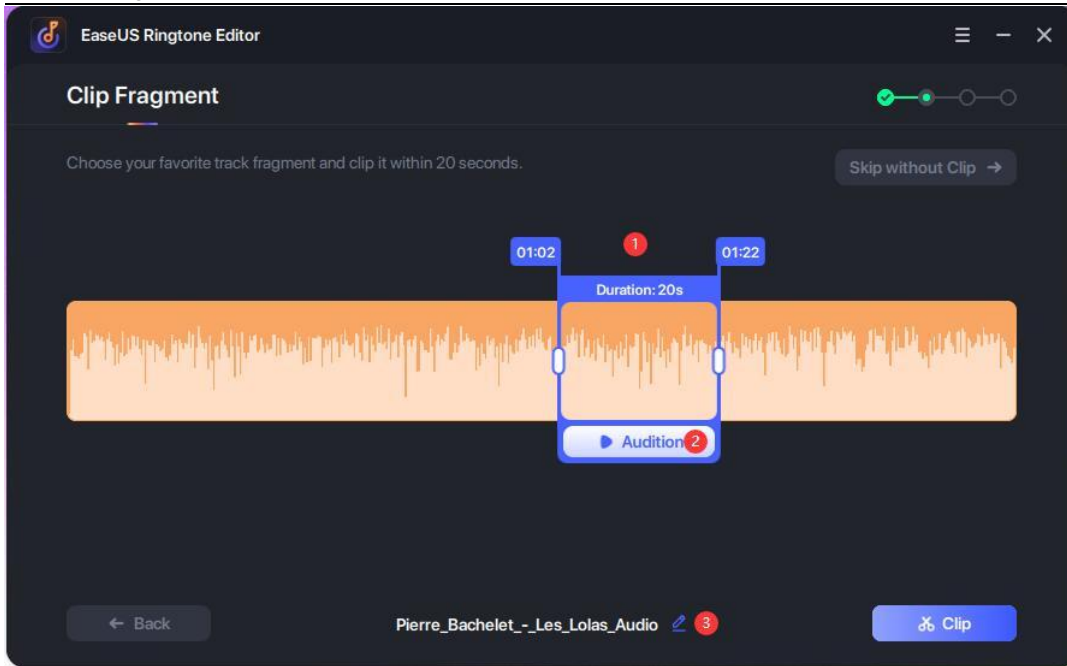

# Search Music File to Make Ringtone

Ringtone Editor Search function is able to search for the music file on internet and directly select it to make ringtone with several steps easily.

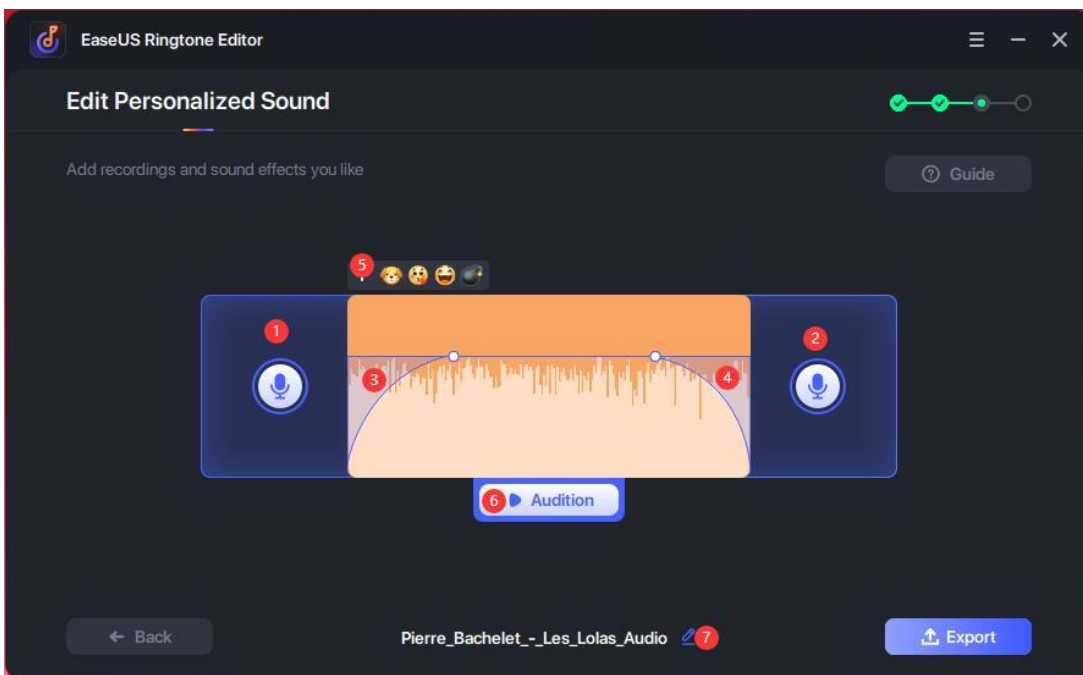

1. Search for music file using keywords and select it to make ringtone.

- 1 Enter keywords of music file.
  - 2 Search for music files.
  - 3 Play it to confirm if it is your desired music file.
  - 4 Select the music file to make ringtone.
2. Choose your favorite track fragment and clip it within 20 seconds.

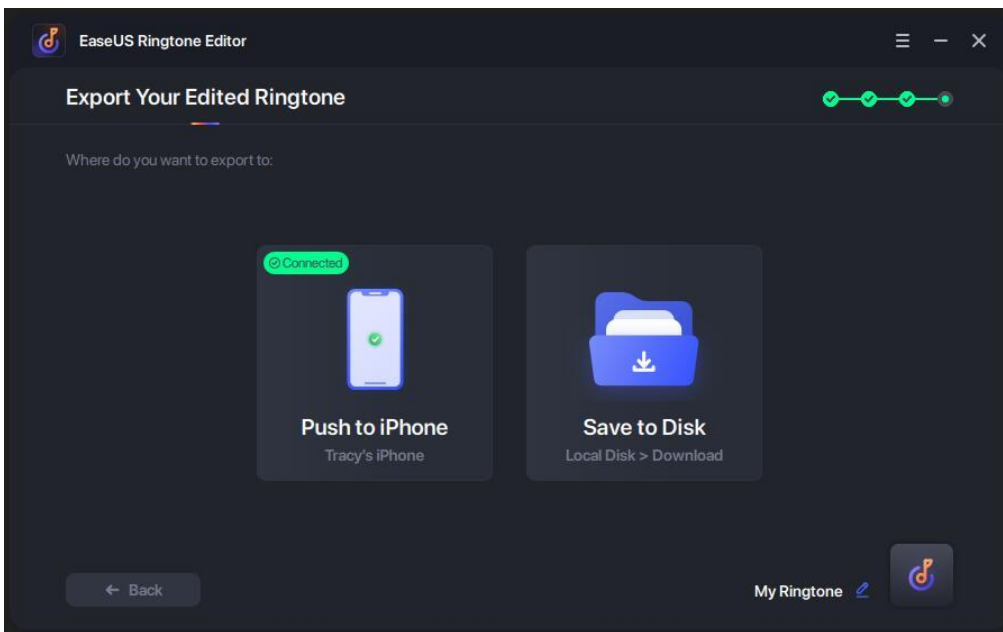

- ① Choose the track fragment.
  - ② Click the **Audition** to address your favorite track fragment.
  - ③ Rename the music file if you need.
3. Please add recordings and sound effects for your ringtone.

- ① Add recording for the head of the ringtone.
- ② Add recording for the tail of the ringtone.

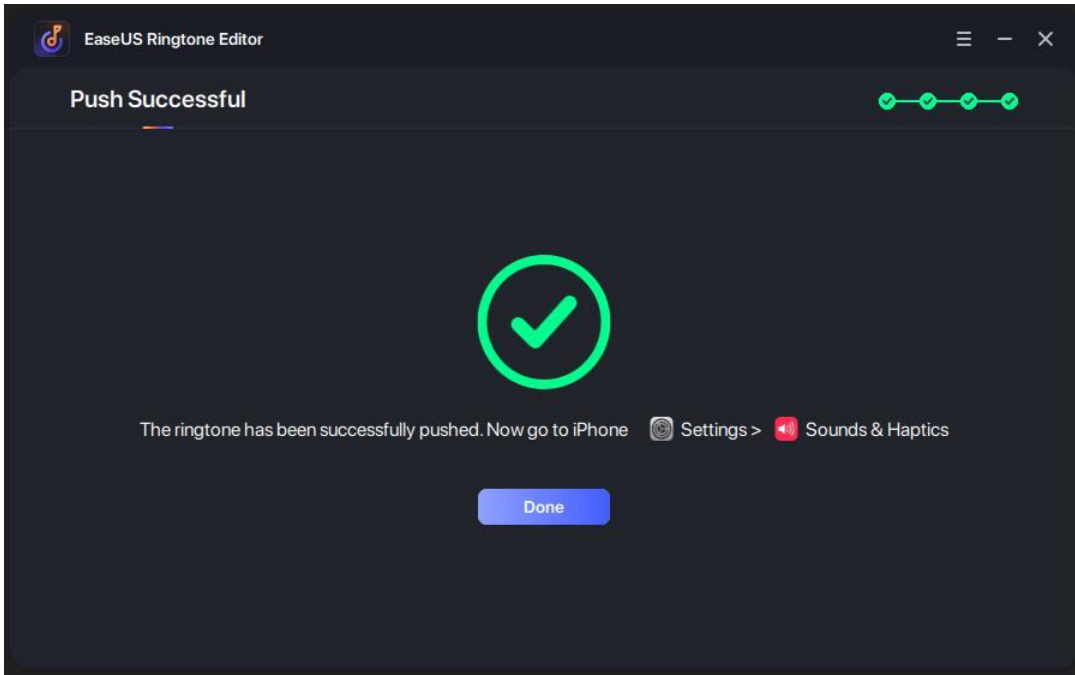

- 3 Fade in the ringtone.
- 4 Fade out the ringtone.
- 5 Add the sound effects for the ringtone.
- 6 Audition the ringtone music.
- 7 Rename the ringtone file if you need.

4. Export the edited ringtone to local disk or directly push it to iOS device.

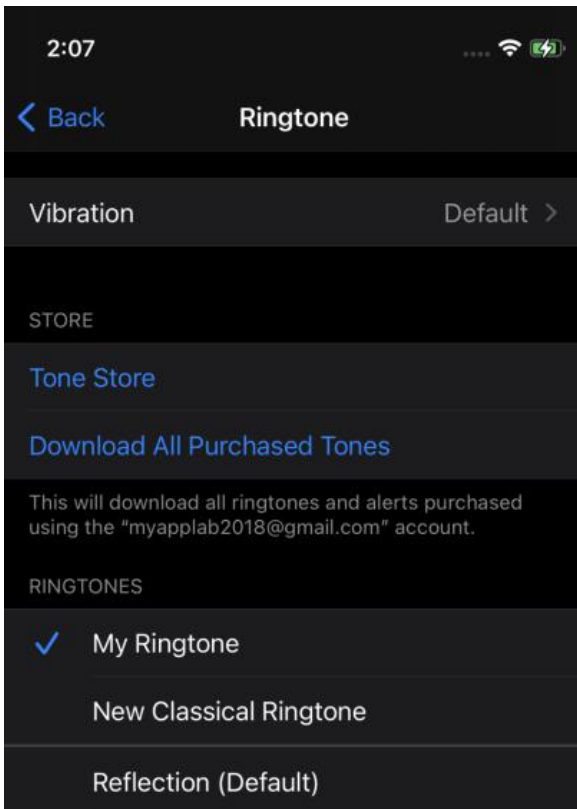

5. The operation was finished after the ringtone was pushed or saved successfully.

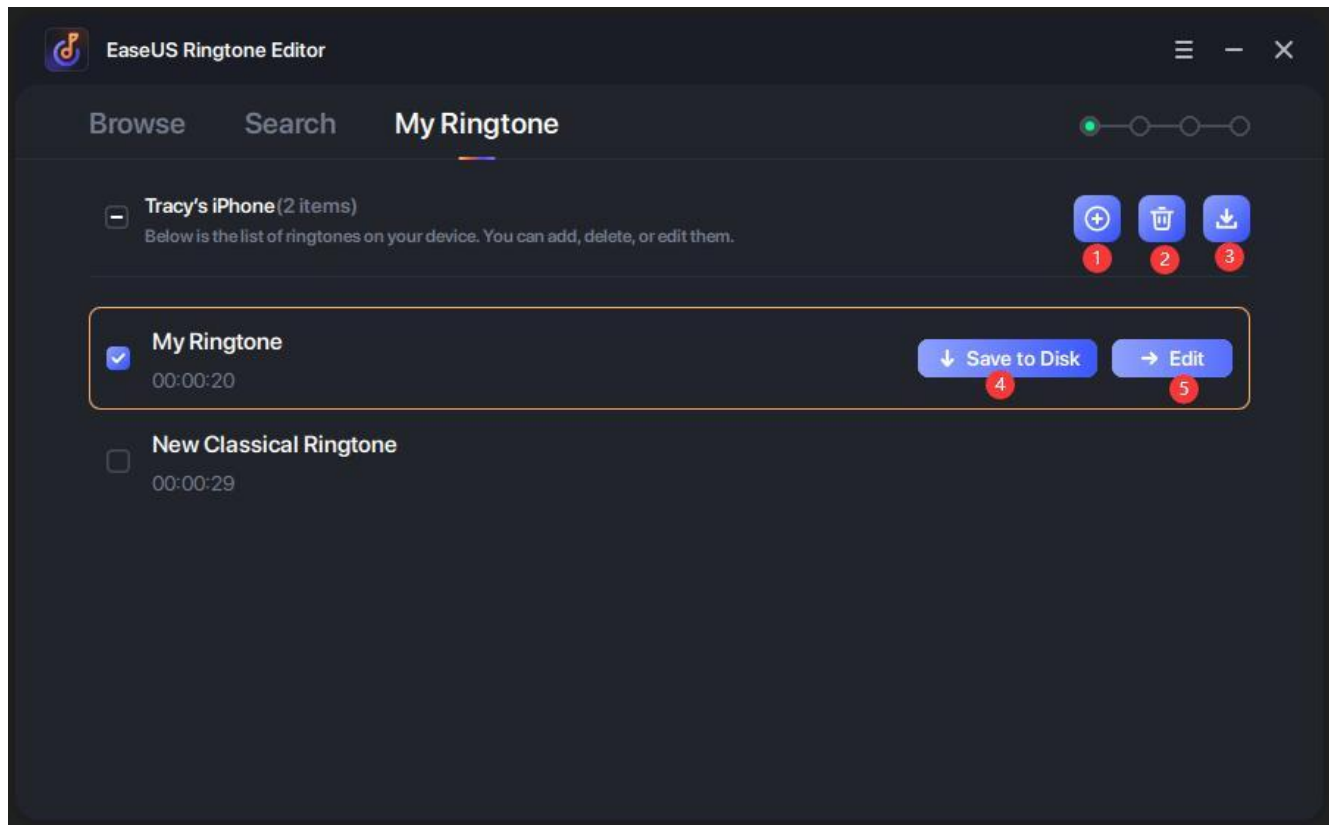

You can directly use the pushed ringtone on your phone.

# Ringtone Management

The pushed ringtone on your iOS device can be managed by Ringtone Editor. You can see all functions on the management window.

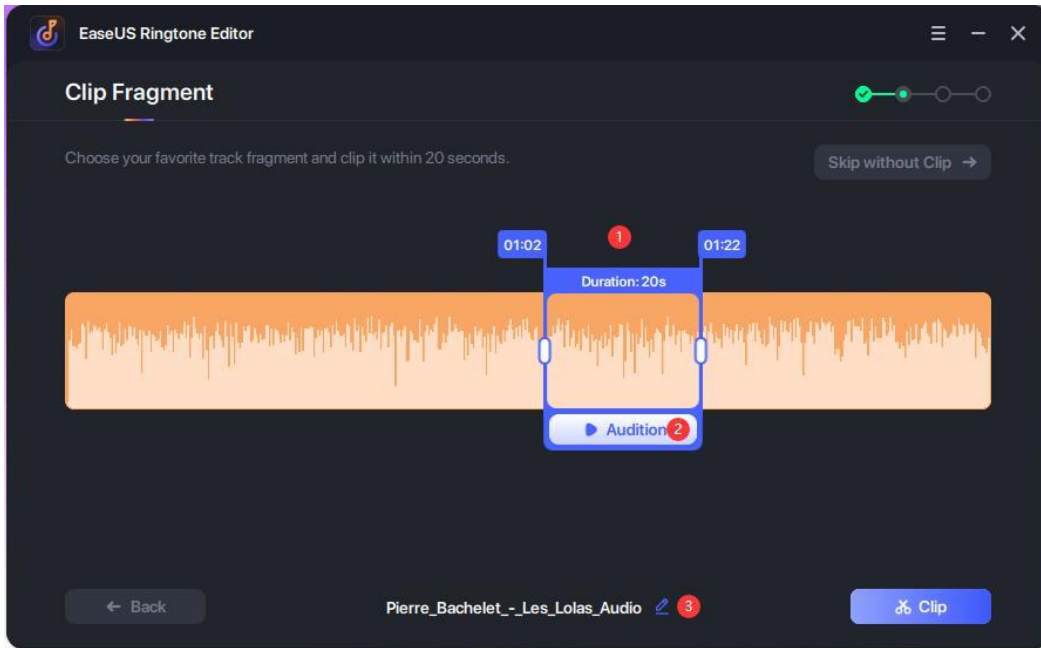

- 1 Add ringtone file to your iOS device.
- 2 Delete the selected ringtone from your device.
- 3 4 Save the ringtone to disk.
- 5 Edit the selected ringtone.

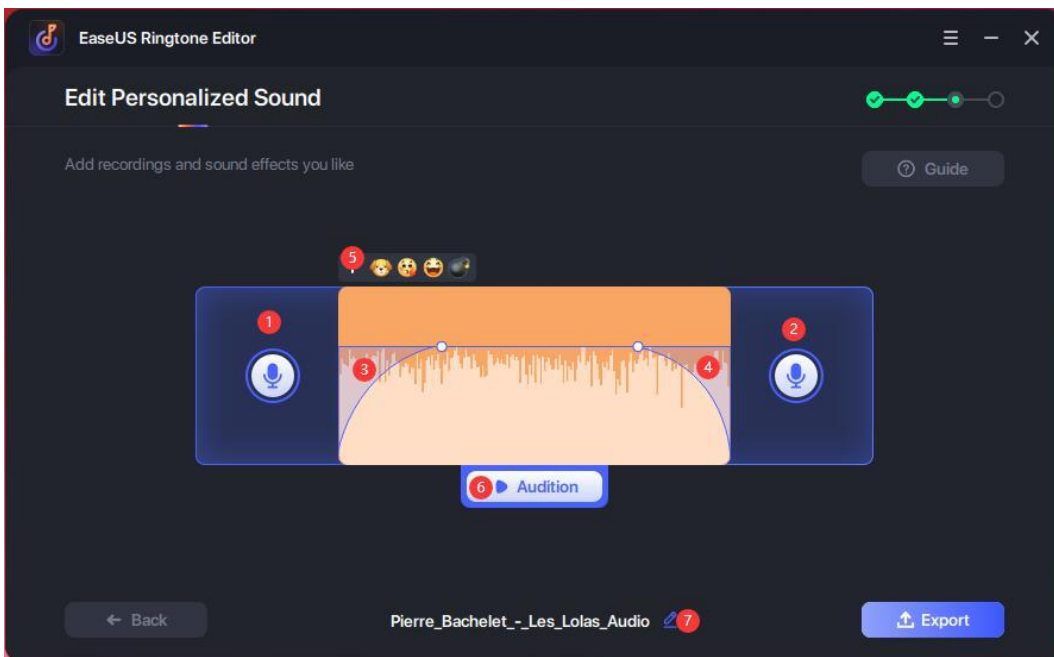

On the upcoming window, you can start making your own personalized ringtone after clicking Edit. It is easy to edit the ringtone with the following steps.

1. Choose your favorite track fragment and clip it within 20 seconds.

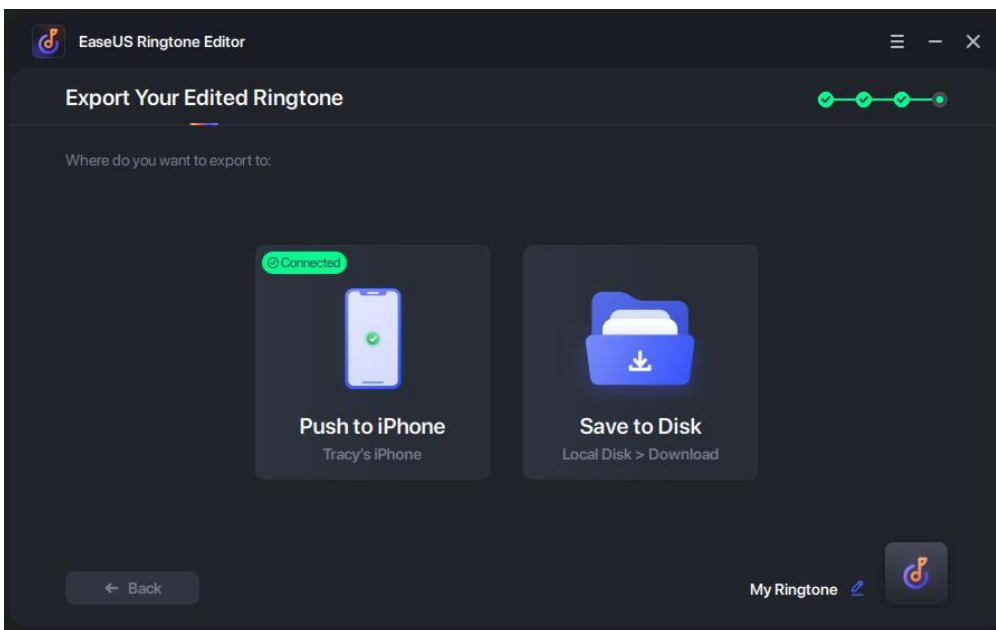

- ① Choose the track fragment.
  - ② Click the **Audition** to address your favorite track fragment.
  - ③ Rename the music file if you need.
2. Please add recordings and sound effects for your ringtone.

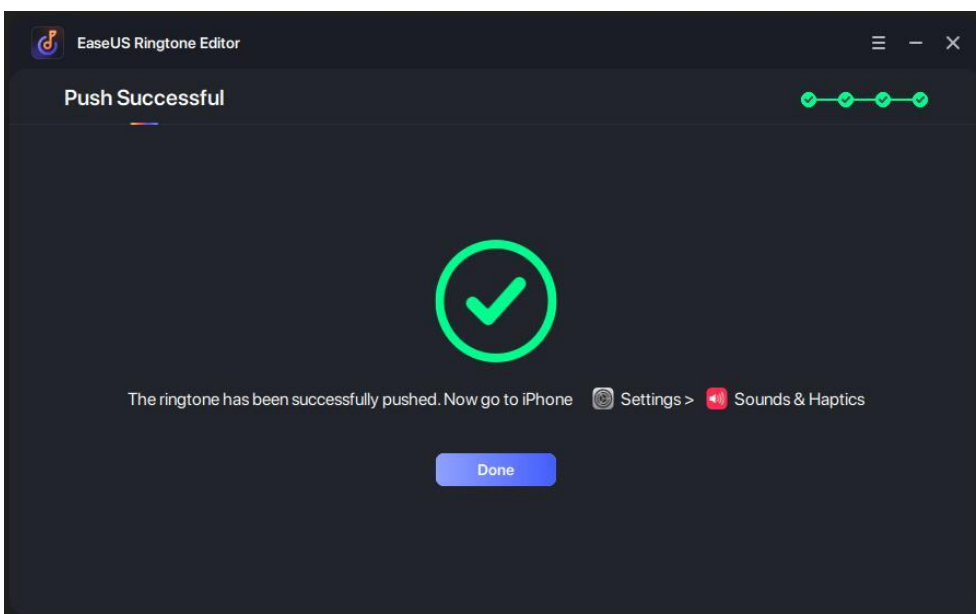

- ① Add recording for the head of the ringtone.
- ② Add recording for the tail of the ringtone.

- 3 Fade in the ringtone.
- 4 Fade out the ringtone.
- 5 Add the sound effects for the ringtone.
- 6 Audition the ringtone music.
- 7 Rename the ringtone file if you need.

3. Export the edited ringtone to local disk or directly push it to iOS device.

4. The operation was finished after the ringtone was pushed or saved successfully.
